ABOUT

This module uses the GLS IIsWebService (https://labelservice.gls-italy.com/ilswebservice.asmx) to create the shipment, get pre-generated GLS parcel label PDF for printing, and see the shipment status in your stores back-office! The transfer of data is entirely done through the Web Service methods: under https://labelservice.gls-italy.com/ilswebservice.asmx

KEY FEATURES

- Create parcel labels without leaving Back Office!
- Customize and download parcel label.
- Parcel label stored in the database in PDF format.
- Automatically add parcel tracking number to the order shipping.
- Daily list view, to check your shipments, possibility of mass sending!
- If COD payment has been selected, it will automatically add the parameter to the label.

SUPPORTED SERVICES

- AddParcel
- CloseWorkDayByShipmentNumber
- DeleteSped
- ListSped

REQUIREMENTS

- ... Supported country: Italy
- ... Login credentials to Web Integrated Labeling Service service by GLS (Test and Live) You must request it from GLS.
- ... Prestashop 1.7.6.0 or higher

- 2. Search for the downloaded module ZIP file, and Upload it.
- 3. After installation go to Configuration page.

CONFIGURATION

Under Client section you must add your MyGLS login details.

Credentials:

- Depot code (2 character)
- Customer code (6 character)
- Customer code (4 digits)
- Password.

Client

* Sede GLS

First thing: Request access to the GLS Web Integrated Labeling Service (test and live) from GLS. Once you have the necessary information, paste it here.

Denot	initials	GIS	(Type)	String	Length 2)

* Cod	ice Clie	nte GLS	5		
Custon	ner code	GLS (Ty	pe: Nun	nber, Le	ngth: 6).
* Cod	ice Con	tratto (GLS		
Contra	ct code	GLS (Typ	e: Num	ber, Len	ngth: 4).
* Clier	nt pass	word			

GLS Italy handle shipment only after you "close" it. You can do it manually, or automatically.

If you choose automatically, then after PDF label request the module will call the "CloseWorkDay" method.

Weight is mandatory for a shipment. If you have not set a weight for the products, it can be replaced with a default value.

You can choose, which one payment method is for COD payments. The module will set it for the shipment.

If you use multiple carriers, you could exclude them to create shipment.

Changing the order status if parcel creation was successful, and the "CloseWorkDay" endpoint was called. (Automatic shipment closing is enabled)

For more information look for GLS Documentation.

For more informat	look for GLS API Documentation.

Use it if you did not specify ts. ck s) you use for COD payment. ere you do NOT want to see the label printing r parcel creation	

HOW TO USE

PS 1.7.7

Generate parcel label: You will find a "New GLS Label" under each order detail page:

💭 View delivery slip	New GLS Parcel	← Return products	← Partial refun

When parcel label created, you will find a new card called GLS, where you will find the the additional parcel shipment details and a **view / download button to print** the label.

You could find three other buttons: Delete shipping, API responses, Close (Send) shipping.

Parcel ID	Tracking number	Created	Closed	Deleted					Action
2	CORRE	2022-09-30 13:44:26	2022-09-30 13:45:30	2022-09-30 13:49:36				0	
ı	a de la secolar	2022-09-30 13:13:59	-	-	POF	+	0	0	~

Also note that the shipping is updated with the tracking number:

Gift message: Si	zia Mókus!				
Date	Carrier	Weight	Shipping cost	Tracking number	
02/05/2022	Galambposta	0.000 kg	Ft502.00	G162 06	Edit

ON PS 1.7.6 EVERYTHING IS THE SAME, ONLY VISUALLY DIFFERENT

There is also a daily list, where you could check your shipment status, and Close and send opened parcels. There is also a daily list where you can check the status of the shipments, as well as close and send the shipments.
